

FINANCIAL MANAGEMENT

STYLE NOTES FOR PROSPECTIVE AUTHORS

Financial Management serves both academicians and practitioners who are concerned with the financial management of nonfinancial businesses, financial institutions, and public and private not-for-profit organizations. *Financial Management's* editorial policy is that the journal serves the profession by publishing significant new scholarly research in finance that is of the highest quality. The principal criteria for which your manuscript will be judged when deciding to publish are: originality, rigor, timeliness, practical relevance, and quality.

- Manuscripts are reviewed with the understanding that they have not been simultaneously submitted to any other journal, that they represent original work of the author(s), and that they have not been previously published either in whole or in part.
- The submission fee for manuscript evaluation is \$150 for FMA members, \$250 for non-FMA members, and \$180 for doctoral students who are not FMA members. The \$250 and \$180 non-member submission fees include a one-year membership in FMA for the submitting author. Payment by either American Express, MasterCard, or Visa is required.
- Manuscripts must be submitted electronically to the Editor, Professor William Christie. Manuscripts must be sent as either Word or PDF files. Since manuscripts are evaluated anonymously, the authors' names should be completely removed from the manuscript, and the authors should ensure that their names do not appear under the Properties of the file they are sending. The cover page in the submitted manuscript should show only the title of the paper and a short, one-paragraph (approximately 100 word) abstract of the article that provides a brief overview of the paper. Authors may attach a separate file including a title page showing author affiliations, date, acknowledgements, etc., or simply include this information in the body of the email.

To submit your manuscript, please use the following web page address:

www.fma.org/FinMgmt/FMSubmissionStepOne.htm

- Equations should be numbered consecutively, with the number in parentheses and flush with the right margin. Equations should be clearly explained in the text, and derivations or proofs may be relegated to an appendix. Where appropriate, it may be helpful to provide supplemental sheets showing all steps in algebraic derivations so that the reviewers do not have to re-create them.
- Tables and figures should appear on separate pages labeled in numerical order with Roman numeral and grouped at the end of the text. Label tables at the top and follow the heading with a description of the table in sufficient detail so that it is capable of standing alone. Label figures in the same manner. Include marginal notation in the article for the approximate placement of all tables and figures.
- Minimize extensive content footnotes.
- Place references in an unnumbered, alphabetical list at the end of the manuscript. Provide all relevant publication information available (i.e., season/month, year, city and state, author(s), etc.) Examples of references are provided below:

References

Brennan, M., 2003, "Corporate Investment Policy," in G. Constantinides, M. Harris, and R. Stulz, Ed., *Handbook of the Economics of Finance*, Amsterdam, Elsevier Science (Forthcoming).
